

# Diploma in Entrepreneurship (Oil & Gas)

## Introduction

The Diploma in Entrepreneurship (Oil & Gas) is developed to cater for working professionals that wish to pursue their education in the field of Oil & Gas. This diploma is an assignment based diploma where evaluation of students is done through assignments they handed in. Apart from that, they also had to actuate a mini project which would be assessed by the education council of Society of Petroleum Technology Specialist.

This diploma programme takes into account the maturity of the working adults thus evaluations are not exam based and this is in lieu with the concept of Life Long Learning.

## Flexibility

The diploma programme runs at a flexible basis in accordance to the schedule of the students. It runs on a modular basis where students would go on to the next module after the completion of the current module. Classes are done in accordance to the schedule of the students. And the duration of the mini project is based upon the commitment of the students.
